

Vinayak V Pastey

Software Engineer I - Data

Organized and self-motivated software engineer with 1.5+ years combined internship and professional experience at the leading fintech firm of Indonesia. Possessing a strong foundation in Java, Python, and JavaScript, coupled with expertise in relational databases (PostgreSQL), distributed cloud development, and Agile methodologies. Demonstrated ability to effectively leverage GCP services and rapidly acquire new technologies. A dedicated team player committed to delivering innovative solutions that drive business value. Continuously expanding technical knowledge through ongoing education and professional development.

WORK EXPERIENCE

Software Engineer I - Data

Jul 2023 - Present

Cermati.com

- Refactored and improved diverse ingestion pipelines to transfer data from more than 10 different sources such as PostgreSQL, MySQL, MongoDB, Facebook, TikTok, other 3rd party APIs etc. into Google BigQuery and GCS.
- Designed and developed a ingestion pipeline to branch from another ingestion pipeline using Google's BigTable, Pub/Sub and BigQuery.
- Maintaining and expanding features in custom components of Apache Nifi.
- Designed and built a python client for Hashicorp's Vault and data flow service between Google DataCatalog and Dataplex.
- Played a crucial role in reconfiguring, re-ingesting and maintaining ingestion services during critical midnight database migrations to ensure data continuity and minimize disruptions.
- Mentoring and guiding interns.

Software Engineer Intern - Data

Jan 2023 – Jun 2023

Cermati.com

- Implemented a Prometheus push gateway to export ingestion metrics (e.g., throughput, latency, error rates) to a Grafana dashboard for visualization and analysis.
- Optimized ingestion configurations to enhance performance and usability. Developed a command-line interface (CLI) client and a REST API endpoint to allow for dynamic configuration updates.
- Served as an on-call engineer for the ingestion and related services. Responded to incidents, performed root cause analysis, implemented corrective actions, and ensured service availability and performance.

Project Intern

Jul 2021 – Jun 2022

Samsung R&D Institute India · Internship

- Programmed and implemented a dataset handling and annotation pipeline for Pose Estimation AI Applications.
- Modelled a neural net for in-house dataset which resulted in an accuracy of 87%.

Team Manager

Oct 2021 – Dec 2022

aerokle Aerodesign Team

- Supervised the team in Research and Development of UAVs in Forestry Applications.
- Built and integrated an Object Detection and Avoidance Algorithm (AI / ML) on a drone using YOLOv4 tiny and IOT sensors.
- Mentored and Oversaw the team for SAE INDIA Aero-design Challenge 2021-22 and SAE Aerothon 2022.

SKILLS

Java

Python

Javascript

SQL

PostgreSQL

Rest APIs

Prometheus

Problem Solving

Google Bigquery

ETL / ELT

Docker

Kubernetes

EDUCATION

Bachelor of Engineering Computer Science & Engineering

KLE Technological University, Hubli

2023 / 8.7 CGPA

12th PUC in Science

Impulse PUC Science College, Hubli

2019 / 88 %

10th in ICSE Board

Parivarthan Gurukul Heritage, Hubli

2017 / 89%

PERSONAL PROJECTS

- aerokle Portfolio Website
- Personal Portfolio Website

CERTIFICATES

- Docker & Kubernetes - Udemy
- Linux Administration - Udemy

ACHIEVEMENTS

- AIR 1 ranking in SAE India Aero- design Challenge 2022 & 2020
- AIR 1 in Preliminary Round, AIR 2 in Final Round at the SAE Aerothon 2021
